CHAINSAW EQUIPMENT

Jono & Johno is the exclusive Australian distributor of Hurricane Chainsaw Products.

The steel used in Hurricane Chain is sourced from Germany. The chain is heat treated and cut in Germany with the only part of the process carried out in China being the assembly. The chain has undergone hardening techniques to increase cutting life. The factory also implemented design changes to optimise oil distribution and reduce stretching during prolonged periods of cutting.

Full-Chisel (Square Corner)

Semi-Chisel (Rounded Corner)

TOP TIP: What's the difference between full and semi chisel chain?

Full Chisel Chain has square-cornered teeth which creates a fast, aggressive cut. However, when used in hard, dry or dirty woods it can degenerate quickly. It is often preferred when cutting cleaner, green timber such as live pine or ash trees.

Semi Chisel Chain has teeth with rounded corners formed by a radius between the top and side plates. It won't cut as fast as full chisel chain but it will stay sharper for longer. It is for this reason that the vast majority of wood cutters prefer semi chisel chain, particularly when cutting Australian hard woods.

There are variations to the semi and full chisel formats, as well as methods of successfully using full chisel chain in hard woods. But as a rule of thumb, semi chisel is for hard, dry and dirty wood and full chisel is for soft, green and clean wood.

CHAINSAW EQUIPMENT

HURRICANE BARS

Hurricane Bars utilise steel sourced from a mill in the United States. The bars are then assembled in the same factory as Hurricane Chain. The roller nose bearings on the Hurricane Professional bars are imported from the same Swiss factory used by the world's leading bar suppliers.

GB EXTRA LONG BARS

GB is one of the only manufacturers in the world capable of producing extra-long bars and variations made for special applications, such as chain saw mills. GB extra-long bars are crafted from solid, high-tech titanium alloy steel with precision-ground grooves...by far, the toughest, most-durable extra-long chain saw bar in the world. **All long bars come standard with a .404" nose, but can be changed to a 3/8" nose for a \$35 fee.**
